COMPLETE, FLEXIBLE AND HIGH PERFORMANCE SERVICE

For over 100 years, Fives Cail has developed and optimized a complete range of continuous centrifugals able to adapt to all applications in the sugar (beet and cane) and refining industries. Our continuous centrifugals process any type of massecuite, from white sugar to last strike massecuite.

The range of possible applications is shown in the following table:

Centrifugal	STG 110	FC1300	FC1550
Basket angle	25°	30°	30°
Basket diameter (mm)	1,100	1,277	1,555
Optional features		Remelt Magmatizing Run-off classification	Remelt Magmatizing Run-off classification
Cane and Refining			
Refined sugar	●		
Plantation White & VHP	●		
A massecuite	●	●	●
B massecuite		●	●
C massecuite		●	●
B or C sugar affination		●	●
Raw sugar affination	●	●	●
Beet			
2 nd strike		●	●
3 rd strike		●	●
2 nd or 3 rd sugar affination		●	●

Fives Cail's continuous centrifugals are designed according to European standards and offer:

- large capacity to suit your current applications and future developments in your plant
- easy maintenance and reduced down time
- power reduction and a small carbon footprint
- low water consumption and excellent sugar quality
- stability and reliability
- simple operation
- quick return on investment.
